

FALL PROTECTION: BEST PRACTICES

This extended session will cover Fall Protection Best Practices, what to do and what you should not do. This subject covers many significant topics and is not designed to be a specialized training but to open up the participants to some of best ways to prevent falls in the workplace, especially construction.

Presenter: MARK HAGGENMAKER, BARTON MALOW

Mark Haggenmaker entered the Safety Field in August of 2012 and has been the Senior Site Safety Supervisor for Barton Malow Company since October of 2014.

He has earned, the Certified Health and Safety Technician title through The Board of Certified Safety Professionals. He is an active Construction Outreach Trainer, First Aid CPR trainer, Infection Control trainer as well as Scissor and Aerial lifts and All terrain and warehouse forklifts.

Prior to entering the field of Safety, Mark spent nearly 40 years in the construction field as a mason and later a masonry supervisor.

As one of over sixty safety Professionals within the Barton Malow Organization, Mark performs Safety Audits on all projects in VA and supports the efforts on projects in NC, MD and PA. Mark reviews the Accident Prevention Plans and meets with sub-contractors prior to onboarding on its Projects. He is a current member of the ANSI, ASSE 10 committee and has received Safety Awards from NAVFAC and The Army Corp. of Engineers.
